## Ballast Partners with Alvéole to Install Rooftop Beehives and Support the Urban Environment

Ballast has partnered with Alvéole to create beehive installments on rooftops across our multifamily portfolio in San Francisco. One of our honeybees visits 50 to 100 flowers during each collection trip and can harvest several thousand flowers in a day. The bees contribute to an urban ecosystem, repurpose unused space, and produce local, artisanal honey for residents to enjoy!
